

## Copy & Restoration

---

Photographs are symbols of irreplaceable memories from our past. Through these cherished keepsakes we relive special moments that we want to preserve for future generations.

Over the years, some of your prints may have been damaged with the passing of time.

At *camera box*, we can restore your old photographs using the latest digital technology. All our restoration work is done on the premises. We never send your originals out to far-away labs, and we always use extreme care when handling your personal photos.

Whether you need a photo completely restored, or you need extra copies for relatives, *camera box* can help. Our staff is ready to assist you.

## Scanning Services

**Print scans (8x10 or smaller)..... \$1 each**  
(minimum of 5 prints)

## PHOTO RESTORATION SERVICES

## Restoration Fees

---

In order to prevent further damage, no restoration work is done to original photographs. Instead, your photo is scanned and the image is repaired and corrected digitally by a skilled computer expert. The different levels of restoration work are listed below.

**Restoration Fee Does Not Include the Cost of Prints**

### **Oversize Copy Fee .....\$15.00**

This fee is required if your original is larger than 8x10, or if it is in a frame. Unframed prints smaller than 8x10 do not require this fee.

### **Minor Restoration .....\$30.00**

This restoration service will enhance photo color, contrast and density. In addition, minor dust spots and small flaws in the background will be removed

### **Basic Restoration .....\$55.00**

The basic restoration is perfect for photographs which are moderately damaged by tears and creases. Facial features should be intact and in good condition. Prints can also be enhanced for color and density.

*Information updated 2-23; prices subject to change without notice*

### **Detailed Restoration..... \$95.00**

This restoration service is required for photographs which have been damaged by temperature changes and time, including major color shifts, extensive creases, tears and rips. Backgrounds can be repaired and recreated. In addition, switching backgrounds or removing persons from photographs requires this Detailed Restoration service. Additional charges may occur if there is extreme damage to the original photograph, or if facial areas have been destroyed.

## Common Problems

---

### **Faded Originals**

If your original print is badly faded, we may be able to enhance the details, but we will not be able to restore the original features that have disappeared over the years. Most photographs can be improved with the enhancing process.

### **Size Problems**

Even with the latest advances in technology, photographs should not be "over enlarged." In most cases, a restored picture should not be duplicated more than twice the size of the original. Therefore, if your original is 4x5", it should not be enlarged to more than 8x10" in size.

### **Uncommon Print Sizes**

Old photographs rarely fall into the standard size categories that we use today. Therefore, we may not be able to reproduce your restored photograph as a standard size without cropping the image.

## Scanning Old Film

In most cases, Camera Box can scan from old slides or negatives. We can reproduce prints from your images if you like, or deliver the scans to you via email, download link, or USB Thumbdrive.

## Archival Print Prices

---

**16x20 (mounted).....\$180.00**

**11x14 (mounted).....\$95.00**

**Two or more..... \$50.00 each**

**8x10.....\$28.00**

**Two or more .....\$14.00 each**

**5x7.....\$16.00**

**Two or more..... \$8.00 each**

**4x5 or 4x6.....\$12.00**

**Two or more..... \$6.00 each**

*camera box* cannot guarantee that your new print(s) will be the exact color, density or clarity of your original print. We try to improve the quality of your image, but this is not always possible with extremely damaged photographs.
