

Copy & Restoration

Photographs are symbols of irreplaceable memories from our past. Through these cherished keepsakes we relive special moments that we want to preserve for future generations.

Over the years, some of your prints may have been damaged with the passing of time.

At *camera box*, we can restore your old photographs using the latest digital technology. All of our restoration work is done on the premises. We never send your originals out to far-away labs, and we always exercise extreme care when handling your personal photos.

Whether you need a photo completely restored, or you need extra copies for relatives, *camera box* can help. Our staff is ready to assist you.

Film Scanning Services

35mm slides \$.75 each
(minimum of 5 slides)

35mm negatives \$1.25 each
(minimum of 5 negatives)

Less than 5 slides or negatives
..... \$5 each

120/220 film or other sizes
..... \$1.50 each

Scans on CD-Rom
..... No Charge

Scans on DVD with Slideshow
..... \$10

Scans on USB Thumbdrive
..... \$15

Standard scanning includes pressurized air removal of dust and debris plus automatic software image cleanup. Note some dust spots may remain in scans of this type from extremely dirty film. Images are scanned for full frame, rotated to proper orientation, and adjusted for basic color, density and contrast. Negatives and slides are scanned at 2400 ppi.

Pro Scan (all sizes) \$15 each
Pro Scans include pressurized air removal of dust plus hand cleanup of remaining dust spots in Photoshop. Images are extensively corrected for color, density and contrast. Negatives and slides are scanned at 4800 ppi.

PHOTO RESTORATION SERVICES

Restoration Fees

In order to prevent further damage, no restoration work is done to original photographs. Instead, your photo is scanned and the image is repaired and corrected digitally by a skilled computer expert. The different levels of restoration work are listed below.

**Restoration Fee Does Not
Include the Cost of Prints**

Oversize Copy Fee \$15.00

This fee is required if your original is larger than 8x10, or if it is in a frame. Unframed prints smaller than 8x10 do not require this fee.

Minor Restoration \$25.00

This restoration service will enhance photo color, contrast and density. In addition, minor dust spots and small flaws in the background will be removed

Basic Restoration \$55.00

The basic restoration is perfect for photographs which are moderately damaged by tears and creases. Facial features should be intact and in good condition. Prints can also be enhanced for color and density.

*Information updated 1-14; prices subject
to change without notice*

Detailed Restoration \$95.00

This restoration service is required for photographs which have been damaged by temperature changes and time, including major color shifts, extensive creases, tears and rips. Backgrounds can be repaired and recreated. In addition, switching backgrounds or removing persons from photographs requires this Detailed Restoration service. Additional charges may occur if there is extreme damage to the original photograph, or if facial areas have been destroyed.

Common Problems

Faded Originals

If your original print is badly faded, we may be able to enhance the details, but we will not be able to restore the original features that have disappeared over the years. Most photographs can be improved with the enhancing process.

Size Problems

Even with the latest advances in technology, photographs should not be "over enlarged." In most cases, a restored picture should not be duplicated more than twice the size of the original. Therefore, if your original is 4x5", it should not be enlarged to more than 8x10" in size.

Uncommon Print Sizes

Old photographs rarely fall into the standard size categories that we use today. Therefore we may not be able to reproduce your restored photograph as a standard size without cropping the image.

Scanning Old Film

In most cases, Camera Box can scan from old slides or negatives. We can reproduce prints from your images if you like, or deliver the scans to you on a CD-ROM, DVD, or USB Thumbdrive.

Archival Print Prices

16x20 (mounted) \$180.00

11x14 (mounted) \$95.00

four or more \$50.00 each

8x10 \$28.00

four or more \$14.00 each

5x7 \$16.00

four or more \$8.00 each

4x5 or 4x6 \$12.00

four or more \$6.00 each

camera box cannot guarantee that your new print(s) will be the exact color, density or clarity of your original print. We try to improve the quality of your image, but this is not always possible with extremely damaged photographs.
